Elementary Summer Tutoring

ENRICHMENT FOR THE NEXT GRADE

Help your child jumpstart their learning this summer! In this program, your child will get a sneak peek of some key concepts in the next grade. They can sharpen their math skills and gain confidence in order to excel next school year.

CONQUERING COVID LEARNING GAPS

During the pandemic, many students fell below grade level in math. Some need an extra boost to catch up, and there is no better way than through individualized learning! They will be assessed on grade-level material to identify any areas of weakness, and a personalized learning plan will then be created based on their specific needs.

Middle & High School Summer Tutoring

TRANSITIONING TO HIGH SCHOOL WITH CONFIDENCE

Heading to high school is a massive transition for teens. In this summer program, the focus is on helping your child catch up on any academic gaps from middle school and allow them to preview some key skills needed for a successful freshman year. They will also learn crucial study strategies and ways to stay organized and on track in high school.

ALGEBRA II PREP

Since math is a cumulative subject, a student needs to master each concept as a the foundation for the next class. In this program, your child will work one-to-one to review the fundamental concepts of Algebra I. Then, they will apply them to the new concepts they'll see in Algebra II.
